**wecycle**

We started the afternoon as usual on Tuesday, the 20<sup>th</sup> of September.

We were dealing with Dutch language when two people rushed into our classroom.

We were very surprised, we did not know who they were (our teacher did).

They did a play about how the world was destroyed and that we should be more careful with nature.

When the play was over, they told us that we would take part of a contest with 60 other schools in the province of Zuid – Holland. We had to answer questions on a paper; you could choose the blue, green, yellow or red answer. Later on the colors showed us what kind of person you are

**Blue – thinking person**

**Green- acting person**

**Yellow – dreaming person**

**Red - a person who wakes people up.**

We have to invent an apparatus/ machinery in witch we are going to collect all kind of electric things that do not work any more.

We can win a price with this.

*the end.*
